

# TB kills 250,000 children a year – so what can YOU do about it?

These children have been cured of TB at *TB Alert* projects. All we need is your support to keep on saving lives.

## Help raise funds for the charity *TB Alert*.

TB is hard to diagnose in children and can result in serious consequences such as permanent deafness, brain damage or bone damage.

BUT TB **is** curable, we just need to make sure that everyone gets the treatment we take for granted in the UK. *TB Alert* is fighting TB worldwide. If children are diagnosed quickly and treated properly, permanent problems can be prevented and they can go back to school.

**Please help children with TB get back to school**

*TB Alert* is a UK charity (no 1071886) raising awareness of TB and funding projects in the UK and poor countries.

We urgently need donations to help us save lives.

**To donate call 0845 223 5293 or see our website [www.tbalert.org](http://www.tbalert.org)**
